ROSES—Three of the Best

AS SHOWN ON FIRST PAGE OF COVER

New Hybrid Tea Rose

ETOILE DE FRANCE

(Star of France)

This is undoubtedly the most magnificent new Rose introduced for many years. It is a strong, healthy grower, quite hardy, and a quick and abundant bloomer; makes beautiful large pointed buds and extra large fully double flowers three and one-half to four and one-half inches across; color very bright, dark rich crimson; exceedingly handsome, and sure to take first place among the finest Roses in cultivation. Its hardiness, vigorous growth and freedom of bloom make it particularly valuable for planting in the open ground, while the large size, exquisite color and the delicious fragrance of its buds and flowers make it especially desirable as a cut flower and forcing Rose. **Strong plants, 15 cents each; two-year-old plants, 35 cents each.**

Newest Red Rose

RHEA REID

This is considered by experts to be the finest Red Rose in existence, surpassing even the well-known favorite American Beauty, which, until the advent of this, the latest debutante in the rose world, had no rival. Rhea Reid is an offspring of American Beauty, which fact alone would place it right in the front rank along with its hitherto unrivaled parent. Its superiority over American Beauty is due to the following great essentials: It is fully as large, is as double as Bridesmaid, as fragrant as La France, as continuous in bloom as The Bride and a much darker and richer red than the American Beauty, as the illustration on the first page of this catalogue fully demonstrates. **Strong, one-year-old plants, 20c., 3 for 50c.; two-year-old plants, 50c., 3 for \$1.25.**

New White Hybrid Perpetual

FRAU KARL DRUSCHKI

A pure paper-white, free-flowering, large-sized Hybrid Perpetual. It is a remarkably handsome plant with bright, heavy foliage and strong, upright growth, the bloom is perfect in form, on fine long stems and of the purest possible white. There is nothing in the line of perfectly hardy Roses that can compare with this one in form, color and general finish. **Price, strong, one-year-old plants, 15 cents each, 3 for 35 cents. Two-year-old plants, 35 cents each; special offer, 3 for 90 cents.**

Our Striking Collection of Double Bedding Petunias

After devoting a great deal of time to Petunias, we have succeeded in getting the finest strain or set of four that we have ever offered. Unsurpassed in brilliancy of colors and the size of the flowers.

PRICE, 10 CENTS EACH; THREE FOR 25 CENTS; EIGHT FOR 50 CENTS

OUR COLOR ILLUSTRATIONS

HARDY PHLOX

AS SHOWN ON FOURTH PAGE OF COVER.

Hardy Phlox is one of the most important of all the hardy plant group. A judicious selection of plants, with care, will give a wealth of bloom from early spring until late fall. Their wants are few, but they well repay any care and labor bestowed upon them. The varieties and improvements yearly produced are legion, but the following list has been carefully culled, and comprises only the very best varieties in their different shades and colors that are to be had. Our collection of Phlox has taken special prizes wherever shown.

- 1.—“**Etna**”—This is without doubt the grandest red variety in our collection. The lithograph on fourth page of cover gives but a faint idea of the rich color and size of trusses.
- 2.—“**Michael Cervantes**”—A magnificent variety, has enormous trusses; color white with large red eye. One of the best.
- 3.—“**Coquelicot**”—Probably the brightest colored

variety yet sent out. A bright clear scarlet, large trusses. By far the best of its color.

- 4.—“**White Lady**”—Pure white.
- 5.—“**Pantheon**”—Large, clear deep bright pink with faint halo; a charming variety.
- 6.—“**Eclaireur**”—Clear rosy-magenta, with large lighter halo; large florets, and magnificent bedder.

PRICE, 10 CENTS EACH, ANY SIX FOR 50 CENTS.

RARE NEW and CHOICE OLD IMPATIENS

AS SHOWN IN COLORS ON PAGE THREE OF COVER.

PRICE, TEN CENTS EACH; ANY SIX FOR FIFTY CENTS.

Some of these are entirely new and distinct in color. All are true ever-bloomers; are good bedders and make splendid pot plants for the house.

- 1.—“**Impatiens Sultani**”—Certainly the freest-blooming bedding or house-plant in cultivation. The plant is literally covered with brilliant, rosy-scarlet flowers. For summer bedding or winter blooming in the house it has no equal.
- 2.—“**Hybrida Rosea**”—Rosy-white.
- 3.—“**Impatiens, The Queen**”—We are among the first to offer this beautiful and rare novelty in Impatiens. In form and foliage it is like Sultani, but color of flower is a handsome shade of salmon, tinged with pink.
- 4.—“**Holstii Hybrida Aurantiaca**”—Orange-vermilion.

5.—“**Impatiens Holstii**”—The flowers measure from one and one-quarter to one and three-quarter inches across, and are of a brilliant vermilion color.

- 6.—“**Alba Rubra Maculata**”—White with red center.
- 7.—“**Carminea**”—Bright carmine.
- 8.—“**Delicata**”—A delicate, light rosy-pink, with a darker colored center.
- 9.—“**Atroviolacea**”—Deep purplish-violet.

The Impatiens delight in a light, rich soil, and thrive best in a partially shaded position. They are a mass of bloom all the time, are splendid bedders and superb pot plants for the house. When grown in pots care should be taken to avoid overwatering.

WE DO NOT HANDLE CHEAP OR INFERIOR SEED, BUT THE BEST THAT GROW.

SEASON OF 1909

TO OUR CUSTOMERS AND FRIENDS:

We take pleasure in sending you our catalogue for the Spring of 1909. It is full of bargains in good things for the lawn and garden and if you have not already sent us an order, we solicit a trial order from you, thereby giving us an opportunity of convincing you that we can give you satisfaction. We guarantee our plants to reach you in good growing condition, which we think a very fair guarantee.

It is now and always has been our aim to please our customers, as we are in the business to stay and realize that to keep you on our books, we must treat you right, so any time you receive plants from us that are not satisfactory, write us immediately, giving a list of them and price paid and we will replace them at our expense. If you know of any of our customers in your vicinity that are dissatisfied with our firm, we would be pleased to have you mention their names and addresses in your letter when sending us your order, which will give us an opportunity to take up the matter with them.

Thanking you for former orders received and hoping to be favored with them in future, we remain,

THE SCHMIDT & BOTLEY CO.

VERY IMPORTANT

Before ordering read the following:—

First of all—Tell us how you want your order shipped. If by mail, we pay postage. If by express, we send it collect, unless you say that we shall pay charges; in that event, we will remove nearly all the soil, thereby making it the same as a mail shipment and make your selection of premiums the same as when plants are sent by mail. This is just what is done by all firms who pay the express charges.

The proper way to have plants sent is for you to pay the express, then we send larger plants, leave on enough soil in order not to disturb the plants and add in enough extra plants to more than pay the express charges.

The amount of charges is given on each shipping tag and if the Agent tries to collect more, pay it and send the tag to us and we will refund the difference. If the amount should not be on the tag, ask your agent for the amount they were billed out of this city. Express charges, as a rule, on a \$3 order, are not more than 35 cents and to far away points about 50 cents, so you can figure for yourself the extra you can get for a small outlay.

N. B.—We do not pay express on fruit or tree orders, nor allow premiums on them, nor put them in your premium list. They are net and not subject to discount, so kindly keep your plant and tree orders separate. Our nurseries and greenhouses are separate and shipments are never sent together, so if you receive your shipment of plants, it is evident we received your order, and fruit and tree order will follow soon afterward.

How We Pack Our Club Orders—Each person's plants will be packed separately, with his or her name attached, so you will have nothing to do but deliver the bundle. If the plants are to be sent by mail, and you desire them to be sent direct to the person, we will do so when their order amounts to \$1.00 or more.

If Plants are to be sent by Express, always mention by which Express Company you wish them sent.

OUR FALL CATALOGUE—On the first of September we issue a Catalogue of Bulbs and Plants for fall planting and winter blooming, such as Hyacinths, Tulips, Narcissus, Crocus, Ixias, Freesias, etc. We mail this Catalogue to all of our customers of this and last year, and we also send it free to others who wish to order.

BE SURE TO SIGN NAME AND GIVE ADDRESS—Many orders reach us lacking either or both. Customers when writing about unsigned orders will aid us in identification by mentioning some of the articles ordered. We have a number of unidentified orders on hand now.

PROMPTNESS—We fully realize the importance of promptness, and nothing would please us better than to ship all orders the same day we receive them. We always make a special effort to do this as long as we can, but in April and May, during the extreme rush, it is impossible for us to do so. We would suggest that from the tenth of April to the last of May, you send in your orders a few days before you want your plants. By doing this you will avoid any possible delay during our busiest months, and remember that it takes orders from two to five days to reach us, and the same length of time for shipment to reach you. Use our order sheet, and help us all you can in this way.

CULTURAL DIRECTIONS FOR CHRYSANTHEMUMS

WHICH, IF FOLLOWED, WILL INSURE SUCCESS.

When to Plant—The Chrysanthemum is easy to please on this point. Any time after the ground can be worked, even up to June 20th, will give you good blooming plants in the fall.

Soil—Dig the ground deep; put in quantities of manure. The Chrysanthemum is a gross feeder; if fed well, the flowers will be large and the plant strong.

Disbudding and Stopping—When your plant is eight inches high, cut back to a height of six inches. Allow your shoots to grow from this main trunk. When these four shoots are four inches high, pinch out the terminal bud, and save three or four branches that will spring from each of these limbs. Allow these last branches to attain a height of nine inches, then pinch back for the last time. **Allow one bud (flower) to each stem, and that a terminal bud.**

When to Lift—In localities subject to heavy frosts in October and November, plants should be lifted into large pots or boxes by September 1st. After lifting, drench thoroughly and **never** allow them to suffer for water. Give manure water, if possible, once a week. If protected from frost by sheeting they need not be brought into the house till well into October, and when brought in, place in a room without fire, give plenty of air when not frosty. **In cold climate winter in cellar.**

Black Aphides—Nothing destroys this troublesome insect so easily as clean cold water dashed on forcibly with a syringe.

Each year the taste for Chrysanthemums becomes more exacting, and to meet it we offer only the finest exhibition and cut-flower varieties—sorts that are noted the country over.

We Have the Finest and Most Complete Assortment of "Mums" in Our City—Cheapest, Too.

Bed of Red Geraniums with Border of Dusty Miller

WE think a bed of Red Geraniums with a border of Silver-Leaved Centaurea, commonly called Dusty Miller, is very popular. For this bed we highly recommend the Red Geranium Heteranthe, without doubt the very best bedding Geranium in America today.

For a Bed Five Feet Across—It will take Twenty Geraniums with a border of Twenty Dusty Miller. Price, complete, Forty Plants, \$2.25 by Express; by Mail, \$2.50. Should you not want the border, the Twenty Geraniums will cost \$1.25.

Should any of our customers prefer Coleus to the Dusty Miller for a border to this bed, we will send them at same price as Dusty Miller. We would suggest the Yellow Coleus Golden Bedder, as it will make a beautiful contrast to the Red Geranium.

Dusty Miller for border, 5 cents each; 50 cents per dozen; \$3.50 per hundred, by express.

For other Geraniums, please see pages 33 to 37.

Our New Departure in Geraniums

We find there is a growing demand for larger size bedding Geraniums. To meet this demand we have grown an immense lot of the two best varieties, Heteranthe, the best red, and S. A. Nutt, the best crimson. These two are without doubt the most popular varieties grown. It will take fifteen of these Geraniums for a five foot bed. Price, strong plants out of 3-inch pots, 15c each; two for 25c; \$1 per doz. Two doz. for \$1.75.

Try a Bed of Red Salvias

as shown on second page of cover, and you will have something dazzling. Plant about ten inches apart.

Price, 6 cents each; 60 cents per dozen; twenty-five for \$1; \$3 per hundred by express.

A Photo of Our Coleus in a Four-inch Pot.

Plant of Red Salvia.

For a striking contrast to the Red Salvias, plant for a border

Yellow Coleus

Six for 25 cents; twenty-five for \$1.00; \$3.00 per hundred by express.

Notice: Some varieties of Coleus make beautiful pot plants if kept pinched back so as to make them grow bushy. We will send five beautiful sorts, suitable for growing in pots, for only 25 cents.

Springfield is known as the world's center for the growing of fine Rose plants, and the large number of greenhouse establishments here count their annual output by the millions. This and our constantly growing business is good evidence that our "methods" are all right.

THE Rose is the "Queen of Flowers." No garden, however small, is complete without Roses. There are no flowers grown that are more universally admired than the Rose, and their cultivation is yearly extending as it becomes more generally known that they are so easily grown, and that they can be procured at so trifling an expense. All that is necessary to have them grow and bloom freely is to plant them in a bed of deep, fresh, loamy soil, well enriched with thoroughly rotted manure, and they are certain to do as well as a bed of Geraniums.

The Springfield method of growing Roses, which has been adopted by all the growers here, is to propagate them in the summer, give them a rest in winter in cold greenhouses, and in spring they are ready for duty with full strength and vigor. The Rose must have a rest each and every year if the best results are to be obtained—this is but natural.

ROSES ALL ON THEIR OWN ROOTS

Our Roses are all grown from cuttings, and are consequently all on their own roots. If they incline to sprout from the root, they should be encouraged to do so, as young, vigorous shoots produce the finest flowers. They cannot throw up wild shoots, because root and top are the same. As long as any part of the plant or root remains it will produce the same beautiful flower. We do not send out any budded or grafted Roses. Grafted Roses should never be planted by anyone not a professional Rose grower—one who knows the wild Rose and keeps it cut away. The results of planting budded stock in

999 cases out of every thousand is a failure for the reason that the wild Rose that is used for budding stock will grow and chokes out the Rose you want to grow. Then the so-called home-grown Roses of mature size are mostly Roses that have been forced in a greenhouse for several seasons for cut flowers and when they are absolutely worthless for any purpose they are sold to confiding amateur Rose growers. Our advice is whatever Rose you plant, don't, for your sake, plant the Rose that has been forced until it is worthless, no matter what name it is sold under. Keep away from them.

PROTECT YOUR ROSES

Although we try to carefully explain in the introduction to each family or class whether the Roses in that class are hardy or not, the safest way is to protect all of your Roses, for it will do no harm to the hardiest, and where manure is used as a covering it also serves the purpose as a fertilizer.

After the leaves have fallen give the beds a covering of manure, straw, cedar boughs, corn fodder, leaves or street sweepings—enough to keep the roots from freezing, but still not to smother the plants. In very cold localities it sometimes pays to wrap the entire bushes in straw or bend them down to the ground and fasten them to stakes driven for the purpose or cover with boards, as the principal object is to keep the plants dry and from the freezing and thawing at times of storms and sleet and rain. But the matter of protection is not such a serious problem these days, when good new Rose plants can be obtained at a very low price. Many people feel that the blossoms produced the first season are worth many times the cost of the plants, and so buy new ones each year.

Blooms from our Hardy Eight.

GENERAL JACQUEMINOT — A rich velvety-crimson, changing to scarlet-crimson; a magnificent Rose; equally beautiful in the bud state or open. This is the best known of all Hybrid Perpetuals, and is without a rival in fragrance and richness of color.

We have been offering our popular "Hardy Eight" Ever-blooming Set of Roses for the past ten years. Every year the demand for them increases. This speaks for itself. They are better than ever this spring.

HELEN GOULD—(The Balduin.) This is a most notable production—the strongest growing, freest blooming and hardiest Hybrid Tea Rose now known. One of the largest and fullest of red Roses. Long, plump buds, forming flowers of grand size and great beauty. A most valuable cut-flower variety, rivaling American Beauty. Rapid, abundant grower, producing great quantities of large, fine flowers.

ETOILE DE LYON—This magnificent Tea Rose is a rich golden-yellow; a strong, healthy and vigorous grower, immense bloomer, bearing flowers and buds early and late. Surely one of the very best and most beautiful yellow Tea Roses for general planting ever introduced. Remarkably hardy.

NEW PURE WHITE ROYAL TEA ROSE, KAISERIN AUGUSTA VICTORIA, THE BEST WHITE ROSE IN THE WORLD—This beautiful Rose has not only a royal name, but is a royal Rose as well. It far surpasses any other white Rose in all particulars, and has a much richer perfume.

HERMOSA, THE OLD FAVORITE—It is hardy as an oak, and always covered with its clear, pink blooms; there is not a shade or color of any kind to mar its purity. We doubt if any Rose ever grown will take its place. No Rose will give more general satisfaction. Price, 15 cents each.

PAPA GONTIER—A grand, red Tea, of fine crimson shade and silken texture (as distinct from velvety texture). The bud is of fine size and graceful form. Extremely free both in growth and bloom. Very long and beautifully-leaved stems can be cut, the foliage being very dark and heavy. One of the best, and a perfect bedder. If you desire a good Rose, one that will give you entire satisfaction, you should procure one of these.

SCARLET BEDDER—This is, without doubt, the very best of all red Roses for bedding. It can be planted anywhere, being entirely hardy. Flowers are large size, fiery scarlet, a color rarely seen in Roses. Planted everywhere on account of its color and freedom of bloom.

Hardy Roses—Hybrid Perpetuals

A SPLENDID LIST, COMPLETE IN EVERY PARTICULAR. NONE BETTER; NONE SO CHEAP.

Hybrid Perpetuals are considered the most valuable of all hardy plants. They are distinguished by their vigorous, upright growth and large, bold flowers, frequently measuring five to six inches in diameter. When you plant Hybrid Perpetuals you may be quite certain of having Roses every year without further trouble. Though called perpetual, it must be understood that they are not such early and constant bloomers as the ever-blooming Roses. The Hybrid Perpetual should not be ordered for house culture, as they are not suitable for that purpose. Do not become impatient if your plantings of these do not bloom the first season—give them a chance to become established. These Roses are especially suited to plant in all the Northern States and Territories, also in the colder parts of the States of Virginia, West Virginia, Kentucky, Tennessee, North Carolina, Arkansas, Missouri, etc.

The flowers are four inches across, perfectly full and double. The color is a clear flesh-pink, with bright red center; it is very sweet and has the delightful fragrance of the wild rose or sweetbriar. It has been called the "Ironclad" Ever-Blooming Rose, for, besides being perfectly hardy, it is entirely free from attacks of insects, rust or blight, and is a real ironclad continuous blooming Rose, entirely different from the old ever-blooming varieties, and having a different style of beauty. This is certainly a grand variety. Price, 15 cents each; two-year-old plants, 40 cents each.

CARNATIONS

THE DIVINE FLOWER.

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground quickly make large specimens, and when brought indoors in the fall, produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive. Don't buy them—grow them yourself. Pinch the plants back frequently during the growing season.

AMERICA

(New.) A soft shade of scarlet. Habit, medium height, with a compact growth. A fine sized flower, well formed, nicely filled and not crowded with petals. Good calyx, and long stiff stems. It is one of the early bloomers. Very free and easy of culture.

RED SPORT

A very good, bright red, strong bushy grower. Extra good for pot growing or bedding out.

LADY BOUNTIFUL

A fine Carnation in size and form. We do not hesitate to recommend this variety as the best white yet introduced. The flowers are very large, borne on a stiff, strong stem; color a pure glistening white.

HARLOWARDEN

Very strong, free grower; extra long stems; large flower, of bright crimson with shadings of scarlet. Very free.

It is a strong, vigorous grower, and is generally recognized to be one of the most profitable Carnations. A No. 1 in every respect, and a variety that we can recommend in the highest terms.

WE OFFER ON THIS PAGE NINE OF THE BEST CARNATIONS.

Price, 10 cents each; three for 25 cents; any seven for 50 cents.

NEW AND BRILLIANT COLEUS

Price, 5 cents each; six for 25 cents, twenty-five for \$1.00; \$3.00 per hundred, by express, purchaser's selection.

Coleus represent more colors in their variegation than any other plant. They are certainly the most popular of colored foliage plants. Whether grown as single specimens or in masses of ribbon lines, they are equally attractive. They are of the easiest culture and well adapted to our climate, flourishing in the hottest sun as well as displaying their beautiful colors in the shady corner where hardly any other plant would do. Plants should be set about a foot apart, so that when the size of the bed is ascertained it is easy to figure how many plants of each kind are needed in a row. All are good bedders and will stand the hot sun without losing their brilliant coloring.

Glory of Autumn—All colors of autumn combined. A most beautiful variety.

Golden Bedder—Clear yellow when well developed. edge somewhat crinkled, with center rib of lighter yellow.

Purple Prince—Dark maroon, with a purple cast, delicately veined with bright red.

Anna Pfister—(The latest novelty.) Has a dwarf growth, and has the effect of a yellow Alternanthera, but somewhat variegated.

Count Cuvier—Center fiery-red, surrounded with deep maroon, edged olive-green, serrated edge.

Fire Crest—The major portion of the foliage is a bright carmine-crimson shade, the edge is slightly marked with golden-yellow, which heightens the coloring; center of the leaves blotched with deep bronze.

Golden Verschaffeltii—This is a beautiful yellow variety, with scalloped edge, tinted delicately with bright red.

Setting Sun—Crimson, with brightest golden edge.

Verschaffeltii—Rich velvety-crimson; the best bedder.

Red Cloud—Bright red; one of the best.

Rainbow—Center clear carmine with broad chocolate border edged green.

Beckwith's Gem—A beautiful fancy variety, with large leaves, of heavy texture and finely scalloped edges. The center of leaf is dark, velvety-maroon, bordered with fiery-red; the edge is green, changing to creamy-yellow at the point of the leaf.

Hero—A deep jet black.

Miss Retta Kirkpatrick—Large white center, shaded with yellow, broad green-lobed margin; large foliage.

Mrs. Hunt—A beautiful carmine center, bordered maroon, with bright green margin.

Tam O'Shanter—Large, deep green foliage, with creamy-white center, heavily splashed carmine and chocolate. A splendid variety for pot culture.

Spotted Gem—Yellow, blotched crimson and green.

Rob Roy—Dark carmine-pink; yellow and green edge, finely serrated.

Queen of the West—Large leaf and slightly serrated; outer band of bright oxide-green with margin of bright yellow and center wedge of creamy-white; the whole covered with blotches and spots of bright carmine and deep maroon.

John Pfister—Has a dwarf growth and has the effect of a red Alternanthera; very much variegated.

TWO BRILLIANT NEW COLEUS OF 1907

ENTIRELY DISTINCT FROM ALL OTHERS.

10 Cents Each; Three for 25 Cents.

Duneria—The grandest Coleus of recent years; has a deep velvety texture. Color crimson-maroon center; beautifully scalloped edge of light red; a fine, showy bedder. A magnificent variety.

Sensation—The grandest Coleus of recent years. Leaves eight to ten inches long and five inches wide; has a deep velvety texture, beautifully scalloped edge; color crimson-maroon, with center of light red.

EVER-BLOOMING CANNAS

AMERICA'S MOST POPULAR BEDDING PLANT.

This Superb Collection includes only the Very Choicest Sorts and Widest Range of Color

For the nicest effect and best results, Cannas should be planted about twelve inches apart, and Coleus about nine inches apart, so measure your beds and you can soon tell just how many you want. Our Cannas are all started and growing in pots, and not dormant roots.

ALEMANNIA

The flowers are truly gigantic in size, the upper petals spreading fully seven inches, and the form is really semi-double. It produces the largest flowers that have been obtained as yet in the way of a Canna. The outer petals are orange-scarlet, with a very broad golden-yellow border. The plant grows about five feet high, with numerous musa-like glaucous leaves. We consider this variety one of the best of the Orchid type. Height five feet.

AMERICA

The first red-leaved Canna in the giant-flowered class. Height four to five feet; foliage fine glossy bronze, almost as if varnished; flowers extra large, deep orange, flamed and striped with deeper shade; distinct from any other Canna, both in foliage and flower. Height three to four feet.

Creamy-White Canna ALSACE

Has creamy-white flowers and blooms throughout the season in fine shapely plants, three to four feet high. Until the introduction of our new white Canna Mt. Blanc, Alsace was the nearest approach to a pure white variety. But it is still in great demand because of its low price and the magnificent and striking effect it produces when planted with other Cannas, especially in large rows and beds. Height four feet.

The Handsome Lily-Flowered Canna,

AUSTRIA

A companion to Canna Italla; the same wonderful qualities of growth and flowers, with the exception that its wonderful large blooms are of a beautiful canary-yellow; height five feet.

BURBANK

Color rich canary-yellow, with a few carmine spots in throat; giant orchid-like flowers, the upper petals measuring fully seven inches across; it is a vigorous-growing plant, attaining a height of about five feet, with shiny leaves of a leathery texture.

CHARLES HENDERSON

The standard of excellence of all crimson Cannas; bright crimson, with pencillings of golden-yellow at center. About four feet in height.

ELDORADO

The flowers are of the largest size, head full, and borne well erect above the foliage, while the habit is more dwarf and compact than Madame Crozy. The color is a rich, pure golden-yellow, speckled with a red so light that the general effect, even at a very short distance, is that of a pure golden-yellow. In this we have an ideal yellow Canna, the flowers of full size, and dropping from the spike as soon as faded, leaving the bed always a mass of brilliant color. Height three and one-half feet.

Duke of Marlboro.

DUKE OF MARLBORO

Beautiful crimson-maroon; the largest Canna grown. A sturdy, erect grower, with fine metallic-green foliage. Height four feet.

DAVID HARUM

Foliage dark, glossy bronze and plum; flowers borne freely in loose trusses; in-color, orange-scarlet, spotted vermilion, with conspicuously protruding pistils of amber. Height three to three and a half feet.

EGANDALE

Probably the finest bedder of its color, if not of the whole list. Deep, soft red, compact spikes of medium size; a wonderful, profuse bloomer, beds of it being literally a mass of red; foliage a beautiful, rich purple. Height four feet.

QUEEN OF HOLLAND

This handsome Canna makes well balanced plants, three to three and one-half feet high. Foliage very dark green, heavily veined and edged with bronze. Bears immense branching trusses of perfectly beautiful flowers. Color deep rich orange. Height three feet.

FLAMINGO

The color is a solid crimson, without spot or blemish; whether grown indoors or out, it is constantly surmounted by a crowning glory of perfect blooms, whose sparkling brilliancy is as bright as the plumage of the Flamingo bird. Foliage a luxuriant, deep green and tropical-like. Height four feet.

The Lovely Orchid-Flowering Canna, ITALIA

J. D. EISELE

Bright vermilion-scarlet, overlaid with orange; a fine bedder. Height three and a half feet.

MLLE. BERAT

This is a pink variety of French origin. Entirely distinct from any other sort. It is much the darkest of all the pink Cannas, being dark carmine-pink. Heads of blooms are held very erect and well above the foliage. A showy, effective bedder. One of the finest introductions. Height four feet.

MME. CROZY

The color is a brilliant vermilion-scarlet, bordered with deep golden-yellow. The flowers are borne in great clusters, and in such profusion that they crown the plant with a blaze of glowing color. Height three and one-half feet.

MISS BERTHINE BRUNNER

Large, open panicles of pure yellow flowers, minutely spotted with orange-scarlet. Height four feet.

The Mammoth-Flowering New Canna,

MRS. KATE GRAY

One of the largest-flowered Cannas ever introduced. Flowers round and full, of a clear wine color, beautifully suffused with gold. Notwithstanding their size, the flowers have a great deal of substance and are very showy and effective. Besides its fine flowering quality, its broad green foliage gives Mrs. Kate Gray another point of merit which makes it one of the best all-around Cannas to date. Height five feet.

PARTENOPE

Flowers of extra large size, the broad, wavy petals glisten like silk; the prevailing color is orange, delicately streaked with scarlet tints, and suffused with salmon; early and a free bloomer, green foliage; five to six feet in height.

The New Salmon-Colored Canna,

PAUL MARQUANT

The individual flowers are large, and the flower spike very large, each flower standing out separately by itself. The color is very hard to describe. It might be described as a bright salmon with a carmine tint. Height four and a half feet.

TARRYTOWN

The Finest of all Red Cannas. No variety Approaches it for Display; Three Feet.

The flowers are large, but its particular value lies in the earliness with which it blooms, the abundance of flowers produced, its branching habit and the length of time the flowers remain after they open. Another point of superiority is the fact that the flowers are

Florence Vaughn.

thrown well above the foliage and the heads of bloom are held very evenly, and so freely produced that the foliage is almost hidden. One characteristic of this variety which largely gives it its value is its wonderful branching habit; two or three spikes of flowers being in bloom on the same stem at the same time, producing a mass of bloom.

PENNSYLVANIA

We ask particular attention to this grand new American Hybrid Orchid-flowering Canna, because in addition to being one of the largest and most magnificent varieties ever introduced, it is the only pure deep red flowering sort in the Orchid-flowering class. The flowers are immense, often seven inches across, with petals two and a half inches broad, borne in splendid branching spikes. A tremendous bloomer; begins quickly, keeps it up. This Canna was the most magnificent of all those grown on our grounds here last summer. Its grand size, pure, deep scarlet color and profuse blooming habit place it at the head of Orchid-flowering Cannas to date. Height six feet.

The Brilliant New Crimson Canna,

PRESIDENT MCKINLEY

Pronounced by all the best dwarf crimson bedder introduced. Color a very deep crimson-scarlet, the nearest approach to the color of the Alphonse Bouvier of any Canna we have. It is an early, constant and immensely profuse bloomer. Height two and a half feet.

The Giant Bronze Canna,

ROBUSTA

This is the largest of all the dark or bronze-leaved Cannas, grows six feet high, with tremendous length and breadth of leaf. It seldom blooms, but for hiding unsightly walls, fences, etc., or for a massive background, it is "just the thing."

7-Foot Canna Bed Similar to the photograph shown above, we recommend the following: *Six Duke of Marlborough* for center, color crimson-maroon, height from four to five feet; for second row, *twelve Florence Vaughan*, best yellow spotted, height four feet, and *eighteen Madame Crozy* for outside row, color brilliant vermilion-scarlet, height about four feet; for a border, *thirty Red Salvias*.

Price, complete, \$5.00 by express; if wanted by mail, \$5.50.

N. B.—Should our customers not desire the varieties we recommend, or the borders, we would be pleased to have them make their own selections at prices stated on three preceding pages.

Many people prefer Canna beds entirely of one kind or color; therefore we offer the following suggestions for planting in such manner: Cannas should be planted in good rich garden soil mixed with half of old, rotten stable manure. Water sparingly for the first two weeks after planting; when growing freely, water liberally. Set the plants twelve inches apart each way, and if more than one kind is used be careful to plant the taller growing kinds in the center and the dwarf ones along the edge. This applies to planting in beds.

Customers can select any variety that we list. It is well to select kinds that will grow the required height you would like to have the plants attain. Note height of each kind is plainly stated in description.

For a Solid Red Bed of Cannas

We would recommend either of the following: *Pennsylvania*, *Flamingo*, *J. D. Eisele*, *Duke of Marlborough*, *Charles Henderson* or *Alphonse Bouvier*. Price, two for 25 cents, five for 50 cents, twelve for \$1.00; in lots of fifty, 8 cents each.

For a border to this red bed we would suggest *Yellow Coleus* or *Dusty Miller*. Price, six for 25 cents, twenty-five for \$1.00; or \$3.00 per 100 by express.

For a Solid Bed of Variegated Cannas

We recommend *Italia* and *Allemania*. Price, two for 25 cents, five for 50 cents, twelve for \$1.00; in lots of fifty, 8 cents each.

For a border, *Red Salvias* or *Dusty Miller*. Price, six for 25 cents, twenty-five for \$1.00; or \$3.00 per hundred, by express.

For a Solid Pink Bed of Cannas

We would recommend *Madame Berat*, which is the best pink, with *Dusty Miller* or *Salvias* or *Coleus* for border. Price, two for 25 cents, five for 50 cents, twelve for \$1.00; in lots of fifty, 8 cents each. *Dusty Miller*, *Salvias* or *Coleus*, six for 25 cents, twenty-five for \$1.00, \$3.00 per hundred by express.

For a Solid Bed of Yellow Cannas

We recommend *Austria*, *Florence Vaughan* or *Berthine Brunner*, with *Red Salvias*, *Coleus* or *Dusty Miller* for border. Price of Cannas, two for 25 cents, five for 50 cents; twelve for \$1.00; in lots of fifty, 8 cents each. Price of *Salvias*, *Dusty Miller* or *Coleus*, 60 cents per dozen, twenty-five for \$1.00, or \$3.00 per hundred, by express.

N. B.—Our Cannas are all started in pots, and ready to make a showing from the start. Ground need not be raised for these beds—plant on the level.

Beautiful Ivy Geraniums

Price, 15 cents each; any two for 25 cents.

ACHIEVEMENT, New Ivy Geranium

This is a grand new novelty from England, being a true cross between the Ivy and the Zonal class. It has the habit and texture of the Zonal with the form of Ivy foliage and also the Ivy bloom. The color is pure self-rose with white eye, immense in size, on long stems, freely produced.

CHAS. TURNER

Best bloomer. Color light scarlet, with soft rose tint, two upper petals veined with maroon-crimson. For general purposes there is not one in all the list of Ivy Geraniums that can compare with this superb variety, which our immense stock enables us to offer very low this season.

Mrs. Banks.

"JOAN OF ARC," New Double White Ivy Geranium

This is one of the most beautiful plants that it has been our privilege to offer. The flowers are perfectly double, white as snow, and literally cover the plant when in full bloom. The foliage is extremely handsome, the dense, glossy green leaves making a most effective background for the great cluster of snow-white flowers.

ALLIANCE

A French hybrid between a Zonal and Ivy, which has retained all the good points of both parents, including the beautiful soft finish of the Ivy and the hardy constitution of the Zonal. It is, therefore, not an ordinary, but an extraordinary variety in all the good points that go to make up an attractive Geranium. Its color is the most exquisite shade of delicate lilac-white; upper petals feathered and blotched bright crimson-rose; flowers semi-double, abundantly produced in fine large trusses; foliage beautiful, clean and of a splendid leathery texture; habit excellent, robust, strong, close jointed. For vases or as a pot plant it is unequalled.

INCOMPARABLE

(Syn. Remarkable.) Trusses very large, florets immense and very regular in form; quite full; the color is an exquisite shade of rosy-carmine.

CAESAR FRANCK

This is unquestionably destined to become the most popular Ivy Geranium yet introduced. The color is a magnificent shade of soft rich crimson, with an exquisite shading of tender rose at the base of petals. The flowers are about as double as Crimson Rambler Rose, which they resemble, only much richer in color and finish, produced on long stems in enormous trusses.

It has proved the most free flowering of all Begonias, always in bloom—spring, winter and summer. The flowers, when first opening, are a bright cherry, changing to a clear coral-red. GORGEOUS BEDDING

Tuberous = Rooted Begonias

Have you tried our Superb Bedding Begonias? If you have not, you should certainly plant at least a few this spring.

THEY ARE GRAND

The tuberous-rooted Begonia is the fashionable plant of the day, and richly does it deserve its honors. The very handsomest of our summer-blooming plants, flowering throughout the season, and as fine and varied in their color as the Geranium family. They are splendid bedders, delighting in a light soil of wood earth, very old cow manure and sharp sand. See that the bed is in partial shade and you will be delighted with the result. In the South, or where they cannot be planted in the shade of a house, a covering of burlap or canvas, some six or eight feet above them, merely to throw off the sun's rays, will allow them to come to absolute perfection, but they must have plenty of light and air. Do not allow them to become dry, and during hot weather they will take two waterings a day. When through flowering they can be dried off, shaken free of earth and wrapped in cotton until February or March, when they may be started again. Single separate colors, white, scarlet, pink and yellow, 10 cents each, three for 25 cents, fifteen for \$1.00. Double, separate colors, white, scarlet, pink and yellow, 15 cents each, four for 50 cents.

But as it begins blooming when quite small, it can be treated as a tub plant

and wintered in the cellar. Price of fine pot-grown plants, which are sure to live and grow off finely, 40 cents each; larger size, 60 cents each.

OLEA FRAGRANS

(Sweet Olive)

An old favorite greenhouse shrub, succeeding admirably as a house plant, producing small, white flowers which are of the most exquisite fragrance, continuing to bloom almost the entire winter. Nice, strong plants, 40 cents each.

Beautiful Ferns

For Specimens and Ferneries

These beautiful plants are now generally cultivated. Their great diversity and gracefulness of foliage make them much valued as plants for vases, baskets or rock work, or as specimen plants for parlor or conservatory. Keep them out of the direct sunlight and water carefully, that the delicate roots lying near the surface may never become dry.

The Wonderful New Fern, BABY'S BREATH

Nephrolepis Amerpohlii—This is the newest and grandest of all Ferns. It is so delicately fine and fluffy in foliage that it has been given various names, among them "Baby's Breath," indicating that its fronds are so very fine and delicate that a baby's breath would set them in motion. Some call it the Philadelphia Lace Fern. Whatever name you call it by, it is a beauty. It was raised by a Mr. Amerpohl, of Janesville, Wisconsin, and named after himself. Our reputation for it, that it is the finest of all Ferns. No Ostrich Plume can compare with it in fluffiness. Price, 40 cents; fine specimen plants, 75 cents.

Whitmanii.

NEW NEPHROLEPIS WHITMANII

The Newest and Finest Fern Yet Introduced. This Fern made its first appearance last fall, not having been offered until then by any firm. It is the best Fern of the Boston type yet introduced. It is somewhat similar to the Fern Tarrytown, but much more compact and shorter in its growth. Price, fine young plants, 15 cents each; strong, three-inch pot plants, 25 cents each; extra fine specimen plants, 50 cents each.

ELEGANTISSIMA OR TARRYTOWN

A sport of the popular *Nephrolepis Piersoni* Fern. Much more beautiful and an improvement over the *Piersoni*. Is more dwarf and compact, the fronds broader and only half the length. The small side pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description—must be seen to be appreciated. Price, nice plants, two-inch pots, 10 cents each; three for 25 cents; strong three-inch pot plants, 20 cents each; extra large specimen plants, 35 cents each; three for \$1.00.

A NOVELTY OF DECIDED MERIT, BOTANICALLY DESCRIBED AS

"*Ceratonia Siliqua*"

Commonly Known as "Candy Tree" and
"St John's Bread"

It is a very pretty evergreen tree with dark, glossy green leaves, resembling somewhat the laurel. It bears freely a wonderful fruit, very much like a mammoth bean pod, of a dark chocolate color, which, when ripe, is edible, being deliciously sweet, with a decided chocolate flavor, from whence it derives its name of Candy Tree. It is a native of southern Germany, where it grows luxuriantly. Is hardy in the South where it will make a very handsome ornamental tree for outdoor planting. In the North it makes an exceedingly attractive plant for the house, as it grows finely in pots, making very shapely plants in a short time. Does well in either shady or sunny position. Price for nice well established plants ten inches high, 20 cents each; a larger size, very nice plants, 35 cents each.

Frond of Elegantisima.

Frond of Pteris Fern.

The New Ostrich Plume Fern,
NEPHROLEPIS PIERSONI

An entirely new form of the famous Boston Fern. The fronds grow in the most luxuriant manner, the pinnae subdividing, making miniature fronds, which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful beyond description—feathery, plummy, nothing describes them better than “Ostrich Plumes,” which they very much resemble. The habit of the plant is grace personified. The fronds arch over in wavy irregularity, delightful to the eye. Price, strong young plants, 10 cents each, three for 25 cents; large, handsome plants from four-inch pots, 20 cents each; extra fine plants, 35 cents each.

The Wonderful Japanese Fern Ball,
DAVALLIA BULLATA NAGAHA

This novelty imported from Japan, we take great pleasure in introducing as one of the best and most satisfactory house Ferns ever offered.

This ball consists of Fern roots about the size of a pencil, woven outside and around a ball of moss. These roots produce beautiful sprays of Ferns from eyes or buds at nearly every inch of their length. Thus the whole surface of the ball soon becomes covered with Fern sprays. They may be suspended in any part of the room or grown on a stand or table.

Directions for Starting—Place ball in water for fifteen minutes and then suspend in any desired position; repeat every two days until growth is started, after which sprinkle occasionally as required. To use in Fern dish, cut ball in halves, placing flat side down, thus getting two dishes of beautiful Ferns. The Fern ball may be allowed to dry up at any time and set away, and started again by watering as before.

Price, for dormant large size, 60 cents

each by express; smaller size, 40 cents

each, by mail, postpaid.

NEPHROLEPIS SCOTTI

Of much dwarfer and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and coarse as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. Price, strong plants, 15 cents each; large plants, 35 cents each.

The Old Reliable Boston Fern.

THE BOSTON DROOPING FERN

Nephrolepis Bostoniensis.

A PAGE OF RARE FOLIAGE AND FLOWERING PLANTS

Ficus Elastica

FICUS ELASTICA (India Rubber Tree)

Very large, smooth, leathery leaves, evergreen foliage. Generally esteemed one of the finest house plants grown, the plant attaining a large size and tree shape. Each new leaf is enclosed in a long, coral-red envelope, looking like a great red flower bud. **Price, fine plants, 50 and 75 cents each.**

Camellia Japonica

The Royal Plant, CAMELLIA JAPONICA

The royal family of greenhouse plants. Leaves glossy-green and flowers of the most exquisite beauty and waxy texture. From pure white to crimson in almost endless variegation. The pure white ones are generally prized above the colored varieties. Their culture is nearly related to that of the Azalea, but their success is more certain. Requires shade and moisture throughout the hot season. Their time of blooming is winter and early spring. Requires a moderate and uniform temperature with as little artificial heat as possible. When set with flower buds great care must be taken in watering—when left too dry the buds are sure to drop. We have a fine assortment. **Price, for very large, strong plants, by express, 75 cents each.**

N. B.—Our Camellias are imported from Holland, and while we exercise great care in sending them true to name, they sometimes become mixed through no fault of ours, and sometimes they will vary a light shade as to color. Consequently under these circumstances we cannot replace them on this account.

**ARAUCARA EXCELSA (Norfolk Island Pine)**

Various names have been selected for this grand plant to properly convey to the mind the appearance of it. Some have called it the "Christmas Tree Palm," from its resemblance to a Christmas tree; others have called it the "Star Palm," because the leaves are arranged to form a perfect star, but no descriptive name can give adequate idea of its beauty. It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage are unequaled in the vegetable kingdom. It is easily grown in the house and is highly ornamental. **Price, nice plants, three and four tiers of leaves, \$1.00 each. Must be sent by express.**

CROTONS

The Crotons are among the finest decorative foliage plants known. Leaves are more or less veined and margined, sometimes entirely variegated with shades of yellow, orange and crimson. Some have long, narrow leaves, arching gracefully, fountain fashion, others broad and short—dark leaved. Some recur very much, others twisted, corkscrew-like. Crotons love heat, sunshine and moisture. We will send you three choice kinds at **15 cents each, two for 25 cents.**

Azalea Indica

AZALEA INDICA

One of the most gorgeously blooming families, together with the showiest of all greenhouse plants. The colors of the flower vary from the purest white to the deepest crimson in untold variations. The soil should always be packed hard when transplanted. Their success depends, however, on the degree of moisture in the atmosphere in which they live. We have a number of the best flowering sorts that will flower finely the coming winter, both double and single flowered. The plants we offer are magnificent specimens—the finest you have ever seen, and all will bloom this year. **Price, fine, large plants, thirty to thirty-six inches in circumference, 75 cents each; six for \$4.25; extra large plants, forty-five to fifty inches in circumference, \$1.00 each.**

American - Wonder - Lemon

Sent Out By Some Under the Spurious Name of "Ponderosa"

THE LARGEST AND FINEST EDIBLE LEMON IN THE WORLD

Price, for very strong young plants, 10 cents each, six for 50 cents; strong, handsome plants, from four-inch pots, 25 cents each; large two-year plants, fruiting size, 50 cents each; very large, handsome plants, exceptionally fine, fruiting size, \$1.00.

NOTICE—We would call the attention of our patrons to the fact that some are sending out our American Wonder Lemon under the fictitious name of "Ponderosa." When ordering this marvelous Lemon, send to us. We introduced it, we named it, and we have by far the largest stock in the world of this splendid Lemon.

THIS TRULY WONDERFUL LEMON

was introduced for the first time to the public in the spring of 1899. Since that time we have grown and sent out thousands to all parts of the country, and the reports we have received from our patrons in all quarters as to its productiveness and size is very flattering.

The American Wonder is a true ever-bearer, blooming and fruiting at the same time. Think of sixty Lemons setting from one branch of bloom on a small twig. It has bloomed and set fruit on the naked trunk of the tree. There is no Lemon in the world to compare with it.

Its Culture—Plant it in any good garden soil in a large pot or small tub, and keep it in the house or cellar during the winter. You can set the tub and plant out on the piazza or lawn when the weather gets warm. Give plenty of water while growing. No plant is easier to grow.

The American Wonder on its own roots—We guarantee the trees to produce the same large fruit. No budding or grafting. Every plant we send out is on its own roots, and will produce fruit as freely and as large as shown in the photograph on this page.

Schmidt & Botley: Louisiana, April 3, 1908.

Gentlemen:—I expect I will be the cause of you receiving many orders sooner or later for the reason that many people have come for no other reason but to see my Lemon. Forty-eight grew and matured on my bush last year. Some of them measured eighteen inches in circumference and weighed two pounds ten and one-half ounces. A photograph of myself and bush, also an article on the care of Wonder Lemon, have been recently published in our parish (Winn) journal. I have received much comment on this article. My bush has two on it today, one of which I believe will weigh two and one-half pounds.

MRS. ROSA WADE.

Louisiana, April 1, 1908.

Schmidt & Botley:

Gentlemen:—I am ordering for neighbors who are in wonder at the sight of my trees, which I bought

from you four years ago, while living at Albemarle, La. My trees are planted in the open ground and at present are loaded with flowers and fruit of different sizes. They are true ever-bearers. I find this Lemon tree in several other catalogues, but am ordering from you to have exactly the right plants.

Yours truly,

EMILY ORY.

Florida, May 1, 1908.

Schmidt & Botley:

Gentlemen:—The American Wonder Lemon I ordered from you is indeed a beauty. It has over 300 blooms on it at the present time, and is indeed a wonder. It is the only one in the county that I know anything about, and I have been offered a large sum for it several times, but I would not part with it. The one that I am ordering now I want to make a friend a present of. I remain,

Yours truly,

MRS. ANGIE BROWN.

We have thousands of testimonials like these, and we guarantee the Lemon to be all we claim for it. No home is complete without one.

SPRAYER

**Sprays Fruit Trees, Potatoes, Vegetables, Tobacco and Cotton.
For Wagons, Windows, Henhouses, Fires, Disinfecting, Etc., Etc.**

Special attention is called to the new "Kant-Klog," the only nozzle that can be successfully cleaned without stopping the spray or removing the nozzle from the tree. The first and only nozzle ever made which gives both flat and round sprays, or solid streams.

A slight pressure of the thumb starts the spray. Remove it and the spray stops instantly.

The Sprayer body is made of heavy polished brass or galvanized steel, as desired. Top and bottom are dome shaped; joined to body under heavy pressure, making a complete double seam. The body is supported and further strengthened by a heavy steel band around the bottom. When completed this body is tested under double the pressure formerly used, so enabling you to get a finer spray for a greater length of time than with any sprayer we have ever made.

The air pump is made of heavy brass two inches in diameter. Hose couplings are solid brass, standard cut threads, ends heavily ribbed to prevent hose slipping off. Hose is high grade, three ply, supported by a coiled spring, bell-shaped at outer end to prevent breaking. A safety-valve is provided to allow air to escape after the necessary pressure has been obtained.

The "Kant-Klog" Nozzle furnished with this machine without extra charge, makes two bell sprays of different size, volume and fineness; one flat spray and two sizes of straight streams.

The new Spring "Hose-Cock" shown above is also furnished with style G without extra cost. Sprayer holds between four and five gallons and can be carried either by carrier strap or air pump handle.

A few seconds working of the air pump thoroughly agitates the solution and charges the sprayer with compressed air. This being a very powerful and elastic force, will, as soon as the thumb presses the "Shut-Off," force out the liquid in the form of either a spray or a solid continuous stream, as desired.

After sprayer is charged, you need not stop for anything; just walk along from one row to another, the machine will supply sufficient spray to enable you to do the work as fast as you can walk. The great saving in time, labor and solution even on small sprayings will more than pay for this splendid machine the first month it is used, to say nothing of the big increase in crops as a result of spraying properly.

Price, with galvanized steel body, \$5.00; with polished brass body, \$6.50.

LILIUM PHILIPPENSIS

This rare and beautiful Lily is a native of one of the high mountain ranges of the Philippine Islands, and a few years ago a large lot was collected by an American and sent to relatives in Ohio. The bulbs thrived remarkably well, and last year we acquired the entire stock. Hence, we can offer superb home-grown bulbs at a low price. It is a great improvement on Liliu Harrisii, the flowers being much larger and a great deal longer, a gracefully tapering trumpet shape, snowy-white in color and of delicate fragrance. The plant is exceedingly graceful, the main stalk being slender and clothed with narrow, grass-like foliage. It is perfectly hardy anywhere in the open ground and a superb garden bulb. But for pots it is more than satisfactory, far excelling the best Harrisii. The bulbs after blooming remain dormant only a short time when new growth and more flowers follow, often as many as three blooming periods a year. The cut represents this glorious Lily faithfully and gives a good idea of its wonderful beauty. Fine flowering bulbs. Price, 25 cents each.

THE NEW HARDY WHITE SPIDER LILY

This grand new Spider Lily has the advantage of being perfectly hardy, and when left undisturbed a few years forms large, imposing clumps that are a mass of clustered heads of pure white, fragrant flowers. The flowers have a peculiar, striking beauty, which must be seen to be appreciated. The flowers are borne in large clusters, are of waxy whiteness and unsurpassed fragrance. More beautiful than most of the high-priced Lilies. An extra choice garden flower which we cannot too strongly recommend. Also a fine pot plant. Fine flowering bulbs, 20 cents each; three for 50 cents.

LILIUM SPECIOSUM MONSTROSUM ALBUM

A variety of the above, with broad, flat stems and immense heads of flowers. Pure white and very fragrant; petals gracefully recurved; a very fine sort. Price, 30 cents each, two for 50 cents.

Hardy Perennial Plants

SUITABLE FOR CEMETERY, LAWN AND GARDEN

Hardy perennials are those plants which die down in winter, but start again in the spring from the root, lasting many years and flowering every year. Never before have they been so popular, and from present indications of a desire for hardy plants, the demand for them will continue to increase, which will make them as popular in the United States as they have been in the horticultural centers of Europe for many years. Some are very useful for screens, some for hedges, rockeries, steep banks and terraces, others for bedding, edging and bordering and cemetery planting; then again others are fine for cutting to be used for table decorations.

Cultivation is of the simplest, beginning with any good garden soil for a foundation, which may be enriched with any good fertilizer, such as well decomposed manure or bone meal, deeply dug, well pulverized, in which the plants should be set as early in the season as possible, so as to enable them to become well rooted and established before hot, dry weather sets in, keeping the ground well stirred, and where it is not convenient to water the beds during hot, dry weather, a mulch of any loose material which will keep the soil from baking will be found beneficial.

Hydrangea Paniculata Grandiflora

OUR FLOWER SEED DEPARTMENT

SEEDS THAT GROW AND BLOOM

We have used the greatest care in obtaining our flower seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planting may be attributed to the manner in which the seed is sown, rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Most flower seeds germinate well in a fine, sandy loam, partly protected from the sun. Heat and moisture are the two essential points to start life in seeds. A general and fatal error is to start the seed too deep; small seeds should be barely covered with fine earth; large seeds by about half an inch. After sowing, the ground should be watered with a very fine sprinkler, regularly. Many seeds are killed by drought.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes—in good garden soil. Cover the seed very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be used in watering the seedlings well after planting and to protect from the sun for a few days with light paper.

The Aster is one of the most popular and satisfactory garden flowers now grown. The profusion of bloom makes it one of the best for bedding, and the lasting quality when cut makes it fine for house decoration. The newer varieties rival Chrysanthemums in color and form. The seed may be sown when trees are starting out in leaf out of doors or sown earlier in the house and transplanted.

Late varieties are usually sown by the middle of May, and the plants set out in July, in rows three feet apart, and two feet apart in the rows. One ounce will produce three thousand plants.
